

GREENCO RATING ASSESSMENT REPORT 2024-25

CII GreenCo Rating System v4

Manipal Group

Reporting Period: April 1, 2024 – March 31, 2025

Generated by HWCAP

Executive Summary

This GreenCo Rating Assessment Report presents Manipal Group's environmental performance for FY 2024-25 across 9 operational sites in Karnataka, India, covering education and healthcare operations serving over 196,500 stakeholders, evaluated against the CII GreenCo Rating System v4 — India's premier voluntary green certification framework.

Key Highlights:

• Energy:	167,081 GJ consumed; 8.4% intensity reduction vs FY 2022-23 baseline
• Renewable Energy:	12,456 GJ (7.5%) from on-site solar; 3,450 kWp installed
• GHG Emissions:	17,010 tCO2e (Scope 1+2); 7.2% intensity reduction
• Water:	628,000 kL consumed; 68% STP-treated water recycled
• Waste:	1,437 MT generated; 34.5% diverted from landfill
• Preliminary Score:	62 / 100 — Silver Level

Table of Contents

SECTION 1: Executive Summary & Introduction

1. Executive Summary	2
1.1 Key Highlights	2
1.2 Preliminary Score & Rating Level	2
2. Message from Leadership	4
2.1 Managing Director's Statement	4
2.2 Sustainability Vision & Commitment	4
3. About This Assessment	4
3.1 Assessment Framework & Standard	4
3.2 Reporting Boundary & Scope	5
3.3 Data Collection Methodology	5

SECTION 2: About the GreenCo Rating System

4. History & Objectives	6
5. Rating Levels & Thresholds	6
6. Ten Performance Parameters	6

SECTION 3: About Manipal Group

7. Organizational Profile	7
7.1 Sites Included in Assessment	7
7.2 Exclusions & Rationale	7

SECTION 4: Score Summary Dashboard

8. Total Score & Rating Level	8
8.1 Parameter-wise Scorecard	8
8.2 Year-on-Year Comparison	8

SECTION 5: Parameter-wise Performance

9. Parameter 1: Energy Efficiency [Max 20 pts]	9
9.1 Specific Energy Consumption	9
9.2 Energy Intensity Reduction	9
9.3 Energy Management System	9
9.4 Energy Audit Frequency & Coverage	9
9.5 Energy Conservation Projects	10
9.6 Total Energy Savings	10
10. Parameter 2: Renewable Energy [Max 15 pts]	10
10.1 Renewable Share of Total Consumption	10
10.2 On-site Solar Capacity (kWp)	10
10.3 Off-site RE / REC Procurement	11
11. Parameter 3: Water Conservation [Max 15 pts]	11
11.1 Specific Water Consumption	11
11.2 Water Intensity Reduction	11
11.3 Rainwater Harvesting	11
11.4 Wastewater Recycled/Reused	12
11.5 Zero Liquid Discharge Status	12

12. Parameter 4: GHG Emissions Reduction [Max 15 pts]	12
12.1 Scope 1 Direct Emissions	12
12.2 Scope 2 Indirect Emissions	13
12.3 GHG Intensity (tCO2e/FTE)	13
12.4 GHG Intensity Reduction vs Baseline	13
12.5 Net Zero / SBTi Commitment	13
13. Parameter 5: Waste Management [Max 10 pts]	14
13.1 Total Waste Generated	14
13.2 Waste Diversion Rate	14
13.3 Biomedical Waste Disposal	14
13.4 Zero Waste to Landfill Progress	15
14. Parameter 6: Material Conservation & Recycling [Max 10 pts]	15
15. Parameter 7: Green Supply Chain [Max 5 pts]	15
16. Parameter 8: Product Stewardship & LCA [Max 5 pts]	16
17. Parameter 9: Innovation for Environment [Max 3 pts]	16
18. Parameter 10: Green Infrastructure & Ecology [Max 2 pts]	16
SECTION 6: Improvement Roadmap	
19. Priority Actions to Advance Rating Level	17
20. Target Scorecard for Gold Level	17
SECTION 7: Appendices	
A GreenCo Scorecard — Complete Indicator Listing	18
B Calculation Methodologies & Emission Factors	19
C Site-wise Environmental Performance Data	19
D Data Sources & Assurance Statement	20

SECTION 1: Executive Summary & Introduction

2. Message from Leadership

2.1 Managing Director's Statement

[INSERT: Statement from the Managing Director / Chancellor on Manipal Group's commitment to environmental sustainability. Include key strategic priorities, achievements in FY 2024-25, and forward-looking targets. Reference the GreenCo certification journey.]

2.2 Sustainability Vision & Commitment

Manipal Group's sustainability vision is to become a net-zero institution by 2040, building on our existing investments in renewable energy, water conservation, and waste management. Our GreenCo assessment marks a significant milestone in operationalising this commitment through a recognised third-party framework.

3. About This Assessment

3.1 Assessment Framework & Standard

This report has been prepared in accordance with the CII GreenCo Rating System v4, developed by the Confederation of Indian Industry (CII) through its Sohrabji Godrej Green Business Centre (CII-GBC), Hyderabad. The GreenCo Rating System was launched in 2011 and is acknowledged in India's Intended Nationally Determined Contribution (INDC) submitted to UNFCCC in 2015 as a proactive voluntary action of Indian industry towards combating climate change.

3.2 Reporting Boundary & Scope

Operational Control approach: This assessment covers all 9 Manipal Group campuses in Karnataka under direct management control during FY 2024-25. The boundary includes MAHE campus (Manipal), KMC Mangaluru, MCOPS, MIT, TAPMI, TMA Pai Hospitals (Udupi & Karkala), Manipal Hospitals Bengaluru, and Bejai/Attavar campuses.

3.3 Data Collection Methodology

All environmental data has been collected via the HWCAP TerraCAP platform, ingesting facility-level meter data, energy bills, waste manifests, and water board invoices. GHG calculations use GHG Protocol Corporate Standard with CEA 2023 emission factors (0.82 kgCO₂e/kWh for KPTCL/MSEDCL grid) and IPCC AR6 GWP100 values for Scope 1 sources.

SECTION 2: About the GreenCo Rating System

4. History & Objectives

The CII GreenCo Rating System is the first-of-its-kind holistic framework globally that evaluates companies on the environmental friendliness of their activities using a life cycle approach. Launched in 2011, it has grown to cover 893+ rated companies and 102 Railway units across India. The objective is to assist companies in improving their environmental performance comprehensively and to go beyond sheer compliance.

5. Rating Levels & Thresholds

Rating Level	Score Range	Description
Certified	50 – 59 points	Entry level — basic green practices implemented
Silver	60 – 69 points	Moderate performance with systemic green initiatives
Gold	70 – 79 points	Strong environmental leadership and performance
Platinum	80 – 89 points	Best-in-class environmental performance
Platinum+	90 – 100 points	Global exemplar in environmental excellence

6. Ten Performance Parameters

#	Parameter	Max Points	Weight (%)
1	Energy Efficiency	20	20%
2	Renewable Energy	15	15%
3	Water Conservation	15	15%
4	GHG Emissions Reduction	15	15%
5	Waste Management	10	10%
6	Material Conservation & Recycling	10	10%
7	Green Supply Chain	5	5%
8	Product Stewardship & LCA	5	5%
9	Innovation for Environment	3	3%
10	Green Infrastructure & Ecology	2	2%
[INS ERT]	TOTAL	100	100%

SECTION 3: About Manipal Group

7. Organizational Profile

Legal Name	Manipal Education and Medical Group
Nature of Ownership	Private — Manipal Academy of Higher Education (MAHE) is a Deemed University under Section 3 of UGC Act
Headquarters	Manipal, Udupi District, Karnataka – 576 104, India
Countries of Operation	India (primary), UAE, Malaysia, Nepal, Antigua and Barbuda, Bangladesh
Sectors	Higher Education, Healthcare (Multi-specialty Hospitals), K-12 Education, Publishing
Total Employees (FTE)	10,980 employees (58% Male, 42% Female)
Annual Revenue	Approx. ₹12,000 Crore (Group consolidated)
Assessment Period	FY 2024-25 (April 1, 2024 – March 31, 2025)
Assessment Tool	HWCAP – Hertzwave Carbon Accounting Platform (TerraCAP v2)

7.1 Sites Included in Assessment

#	Entity Name	Type	Location	Scale	Key Impacts
1	Manipal – HS Campus (Health Sciences)	Higher Education	Manipal	3,200 students	Energy, Water, Waste
2	Manipal – MIT Campus	Technical Education	Manipal	8,500 students	Energy, GHG, Waste
3	Manipal – Hospice Care Center	Healthcare	Manipal	45 beds	Energy, Bio-waste
4	TAPMI	Management Education	Manipal	850 students	Water, Energy
5	TMA Pai Hospital – Udupi	Multi-specialty Hospital	Udupi	350 beds	Bio-waste, Energy
6	TMA Pai Rotary Hospital – Karkala	Healthcare	Karkala	180 beds	Climate, Waste
7	Mangalore – Lady Hill Hospital	Healthcare	Mangalore	280 beds	Biodiversity, Energy
8	Mangalore – Attavar Campus	Mixed Use	Mangalore	1,200 students	Biodiversity, Community
9	Mangalore – Bejai Campus	K-12 Education	Mangalore	2,800 students	Biodiversity, Safety

Exclusions:

[INSERT: Note any Manipal Group entities/operations excluded and reasons — e.g., international campuses (UAE, Malaysia) reported separately, JVs, etc. State consolidation approach: Operational Control.]

SECTION 4: Score Summary Dashboard

8. Total Score & Rating Level

Manipal Group achieves a preliminary score of 62 out of 100 points under the CII GreenCo Rating System v4, qualifying for the Silver rating level (60–69 points). This represents strong performance in energy efficiency, water conservation, and waste management, with significant opportunity in renewable energy, LCA, and net zero commitment.

8.1 Parameter-wise Scorecard

Parameter	Score Achieved	Max Points	Achievement %
1. Energy Efficiency	15.7	20	78.5%
2. Renewable Energy	7.0	15	46.7%
3. Water Conservation	9.0	15	60.0%
4. GHG Emissions Reduction	9.1	15	60.7%
5. Waste Management	5.4	10	54.0%
6. Material Conservation & Recycling	3.8	10	38.0%
7. Green Supply Chain	3.1	5	62.0%
8. Product Stewardship & LCA	0.0	5	0.0%
9. Innovation for Environment	1.0	3	33.3%
10. Green Infrastructure & Ecology	0.8	2	40.0%
TOTAL	62 / 100	100	62.0% — SILVER

8.2 Year-on-Year Comparison

[INSERT: Year-on-year comparison table for FY 2023-24 vs FY 2024-25 scores per parameter. If this is the first GreenCo assessment, state: "This is Manipal Group's inaugural GreenCo assessment. Baseline for future year-on-year tracking."]

SECTION 5: Parameter-wise Performance

9. Parameter 1: Energy Efficiency [Max: 20 pts]

Management Approach

Manipal Group has demonstrated strong energy efficiency performance through systematic LED retrofits across 6 campuses, deployment of Building Management Systems (BMS) at major facilities, HVAC optimisation, and appointment of a BEE-certified Energy Auditor. Annual energy audits cover 82% of total consumption. Total energy savings of 7,436 GJ were achieved in FY 2024-25, representing an 8.4% reduction in specific energy consumption relative to the FY 2022-23 baseline. Policies and Commitments: Energy Efficiency Policy adopted 2023; targets 15% renewable energy by 2030; ISO 50001 implementation planned at 3 priority sites by FY 2026.

9.x Indicator Details

Code	Indicator	Score	Max	Disclosed Value / Status
GC-E1	Specific Energy Consumption (GJ/FTE)	3.2	4	15.2 GJ/FTE
GC-E2	Energy Intensity Reduction vs. Baseline (%)	3.0	4	8.4% reduction vs. FY 2022-23
GC-E3	Energy Mgmt System (ISO 50001 / BEE Star)	2.0	3	BEE Energy Auditor appointed; ISO 50001 planned FY 2026
GC-E4	Energy Audit Frequency & Coverage (%)	2.4	3	Annual audit; 82% of total consumption audited
GC-E5	No. of Energy Conservation Projects Implemented	2.5	3	17 projects: LED retrofits, HVAC optimisation, BMS deployment
GC-E6	Total Energy Savings Achieved (GJ/year)	2.6	3	7,436 GJ saved in FY 2024-25
[INSERT]	PARAMETER TOTAL	15.7	20	78.5% achievement

■ **Recommendation:** Pursue ISO 50001 certification at the MAHE and MIT campuses by FY 2026 to achieve the maximum 3 points on the EMS sub-indicator. Target a further 5% specific energy reduction in FY 2025-26 through expanded BMS coverage.

10. Parameter 2: Renewable Energy [Max: 15 pts]

Management Approach

Renewable energy currently contributes 7.5% (12,456 GJ) of Manipal Group's total energy consumption of 167,081 GJ, sourced entirely from on-site rooftop solar installations with 3,450 kWp installed capacity across three campuses. No off-site renewable energy procurement or Renewable Energy Certificate (REC) purchases have been initiated to date, representing the primary gap in this parameter. Policies: Solar expansion plan under development; target 10% renewable share by FY 2026.

10.x Indicator Details

Code	Indicator	Score	Max	Disclosed Value / Status
GC-RE1	Renewable Energy as % of Total Consumption	3.8	6	12,456 GJ / 167,081 GJ = 7.5%
GC-RE2	On-site Solar Installed Capacity (kWp)	3.2	5	3,450 kWp (MAHE Manipal, KMC, MCOPS)
GC-RE3	Off-site RE Procurement / RECs (MWh)	0.0	4	[Data Pending — not yet procured]
[INSERT]	PARAMETER TOTAL	7.0	15	46.7% achievement

■ Recommendation: Procure Renewable Energy Certificates (RECs) or enter into long-term Power Purchase Agreements (PPAs) to cover at least 20% of grid electricity demand by FY 2026. This single action would push the renewable share above 20%, unlocking an additional 3+ points on this parameter.

11. Parameter 3: Water Conservation [Max: 15 pts]

Management Approach

Water conservation is a material topic for Manipal Group given the scale of operations across hospital and campus facilities. The group has established rainwater harvesting systems at 5 sites capturing 89,000 kL annually. Specific water consumption stands at 57.2 kL/FTE, a 6.1% improvement over the FY 2022-23 baseline. 68% of STP-treated water is reused for landscaping and flushing. Policies: Water Stewardship Policy 2024; targets 20% reduction in per-capita consumption by FY 2025 and Zero Liquid Discharge pilot at TAPMI by FY 2027.

11.x Indicator Details

Code	Indicator	Score	Max	Disclosed Value / Status
GC-W1	Specific Water Consumption (kL/FTE)	2.8	4	57.2 kL/FTE (628,000 kL / 10,980 FTEs)
GC-W2	Water Intensity Reduction vs. Baseline (%)	1.8	3	6.1% reduction vs. FY 2022-23
GC-W3	Rainwater Harvesting Volume (kL/year)	2.4	3	89,000 kL harvested across 12 RWH pits at 5 sites
GC-W4	Wastewater Recycled / Reused (% of total)	2.0	3	68% of STP-treated water reused for landscaping and flushing
GC-W5	Zero Liquid Discharge (ZLD) Status	0.0	2	[ZLD not yet implemented — TAPMI pilot planned FY 2027]
[INSERT]	PARAMETER TOTAL	9.0	15	60.0% achievement

■ **Recommendation:** Implement ZLD at the TAPMI campus as a pilot by FY 2027 to capture 2 points on this sub-indicator. Install sub-metering at all major water use points to improve data granularity and target a 15% withdrawal reduction by FY 2026.

12. Parameter 4: GHG Emissions Reduction [Max: 15 pts]

Management Approach

Manipal Group's total Scope 1 and Scope 2 GHG emissions for FY 2024-25 are 17,010 tCO₂e. Scope 1 emissions (2,450 tCO₂e) arise from diesel generators, LPG kitchens, and fleet vehicles. Scope 2 emissions (14,560 tCO₂e) are calculated using the Karnataka KPTCL/MSEDCL location-based grid factor of 0.82 kgCO₂e/kWh (CEA 2023). GHG emission intensity has reduced by 7.2% vs. the FY 2022-23 baseline. Policies: Climate Action Plan 2024-2030, aligned with Paris Agreement. SBTi-aligned targets under development; submission targeted for FY 2025-26.

12.x Indicator Details

Code	Indicator	Score	Max	Disclosed Value / Status
GC-G1	Scope 1 GHG Emissions (tCO ₂ e)	2.4	3	2,450 tCO ₂ e (Diesel: 1,820 LPG: 380 Fleet: 250)
GC-G2	Scope 2 GHG Emissions — Location-based (tCO ₂ e)	2.5	3	14,560 tCO ₂ e (Grid: 0.82 kgCO ₂ e/kWh, CEA 2023)

Code	Indicator	Score	Max	Disclosed Value / Status
GC-G3	GHG Intensity (tCO ₂ e/FTE) — Auto-calculated	2.0	3	0.086 tCO ₂ e/FTE [auto-calculated from Scope 1+2 / FTEs]
GC-G4	GHG Intensity Reduction (%) vs. Baseline	2.2	3	7.2% reduction vs. FY 2022-23
GC-G5	Net Zero / SBTi Commitment (documented target)	0.0	3	[Net Zero commitment not yet formalised — SBTi submission planned FY 2025-26]
[INSERT]	PARAMETER TOTAL	9.1	15	60.7% achievement

■ Recommendation: Formalise a Net Zero commitment with SBTi validation by FY 2026 — this single action unlocks 3 points. Simultaneously, expand solar capacity to 6,000 kWp to reduce Scope 2 emissions by 15% and improve both intensity metrics.

13. Parameter 5: Waste Management [Max: 10 pts]

Management Approach

Waste management is particularly significant for Manipal Group given healthcare operations generating biomedical waste regulated under BMW Rules 2016. Total waste in FY 2024-25 was 1,437 MT. 34.5% (496 MT) was diverted from landfill via recycling (340 MT) and composting (156 MT). All biomedical waste is disposed via authorised CBWTF in Karnataka. No formal Zero Waste to Landfill programme is in place. Policies: Zero Waste Policy 2022; segregation at source mandatory; BMW Rules 2016 compliance; target 50% diversion by FY 2025.

13.x Indicator Details

Code	Indicator	Score	Max	Disclosed Value / Status
GC-WM1	Total Waste Generated (MT/year)	1.6	2	1,437 MT (Bio: 145 General: 1,245 E-waste: 12.5 Hazardous: 34.8)
GC-WM2	Waste Diversion Rate (% from landfill)	1.8	3	34.5% (496 MT): Recycled 340 MT Composted 156 MT
GC-WM3	Biomedical Waste Disposal via authorised CBWTF (%)	2.0	2	100% via authorised CBWTF (Karnataka state-approved facilities)
GC-WM4	Zero Waste to Landfill (ZWTL) Progress (%)	0.0	3	[ZWTL programme not yet initiated]
[INSERT]	PARAMETER TOTAL	5.4	10	54.0% achievement

■ **Recommendation:** Launch a formal ZWTL programme with 80% diversion target by FY 2027. Focus on waste segregation at source across all campuses. Partner with local recyclers for paper, plastic, and metal waste streams.

14. Parameter 6: Material Conservation & Recycling [Max: 10 pts]

Management Approach

Material Conservation and Recycling covers three key dimensions: material efficiency improvement, use of recycled/sustainable content, and EPR compliance. Manipal Group achieved a 4.8% improvement in paper/consumables per FTE vs. the prior year. EPR registration is completed (MH-BMM-00012340) with 12.5 MT e-waste channelised via authorised PROs. Recycled content data for purchased materials has not yet been systematically quantified — identified as a data gap for FY 2025-26.

Code	Indicator	Score	Max	Disclosed Value / Status
GC-MC1	Material Efficiency Improvement (% vs. prior year)	2.0	4	4.8% improvement in paper/consumables per FTE
GC-MC2	Recycled / Sustainable Content in Materials (%)	0.0	3	[INSERT: % recycled content in key procurement categories. Data collection in progress.]
GC-MC3	EPR Compliance for Plastic/E-waste	1.8	3	EPR registration complete; 12.5 MT e-waste via authorised PROs
[INSERT]	PARAMETER TOTAL	3.8	10	38.0% achievement

15. Parameter 7: Green Supply Chain [Max: 5 pts]

38% of key suppliers (by spend) have been assessed on green criteria via the TerraCAP Supplier Evaluation module. A Green Procurement Policy was approved by the Board in FY 2024, covering medical consumables, IT equipment, and facilities management. Sustainability criteria are now included in supplier onboarding contracts for all new suppliers with annual procurement value exceeding ₹50 Lakh.

Code	Indicator	Score	Max	Disclosed Value / Status
GC-SC1	Suppliers Assessed on Environmental Criteria (%)	1.5	3	38% of key suppliers by spend assessed via supplier portal
GC-SC2	Green Procurement Policy (documented & implemented)	1.6	2	Board-approved Green Procurement Policy FY 2024 — covers medical consumables, IT, facilities
[INSERT]	PARAMETER TOTAL	3.1	5	62.0% achievement

16. Parameter 8: Product Stewardship & LCA [Max: 5 pts]

[INSERT: Life Cycle Assessment has not been conducted for any Manipal Group service or product stream. As an education and healthcare provider, applicable LCA scope would cover high-impact service streams such as hospital consumables lifecycle, campus food service, and laboratory chemicals. This is identified as the highest priority gap for FY 2025-26. Commission at least one LCA study to begin scoring in this parameter.]

Code	Indicator	Score	Max	Disclosed Value / Status
GC-PS1	Life Cycle Assessment (LCA) for key services	0.0	3	[INSERT: LCA scope, methodology, findings. Not yet conducted.]
GC-PS2	Eco-design / Environmental Labelling Initiatives	0.0	2	[INSERT: Any eco-design or environmental labelling initiatives. Not yet initiated.]
[INSERT]	PARAMETER TOTAL	0.0	5	0.0% — priority action required

17. Parameter 9: Innovation for Environment [Max: 3 pts]

₹42 Lakh was invested in green innovation initiatives in FY 2024-25, including an EV fleet transition feasibility study, solar expansion modelling, and AI-based Building Management System (BMS) piloted at the MAHE campus. No green patents have been registered. Participation in the CII GreenCo Innovation Registry is planned for FY 2025-26.

Code	Indicator	Score	Max	Disclosed Value / Status
GC-I1	R&D; / Innovation Investment in Green Projects (₹ Lakh)	1.0	2	₹42 Lakh in EV fleet, solar feasibility, AI-BMS pilot
GC-I2	Green Innovation Patents / CII-recognised Initiatives	0.0	1	[INSERT: Any registered green patents or CII Innovation Registry entries]
[INSERT]	PARAMETER TOTAL	1.0	3	33.3% achievement

18. Parameter 10: Green Infrastructure & Ecology [Max: 2 pts]

85,000 sqm of green cover is maintained across all Manipal Group campuses. 2,400 trees and 3,200 saplings were planted in FY 2024-25. No formal Biodiversity Action Plan (BAP) has been documented. An ecological survey at 3 Mangalore sites is planned for Q2 FY 2025-26.

Code	Indicator	Score	Max	Disclosed Value / Status
GC-GI1	Green Cover / Plantation Area (sqm or trees planted)	0.8	1	85,000 sqm green cover; 2,400 trees; 3,200 saplings FY 2024-25
GC-GI2	Biodiversity Action Plan (documented)	0.0	1	[INSERT: Biodiversity Action Plan — not yet developed. Ecological survey planned Q2 FY 2025-26]
[INSERT]	PARAMETER TOTAL	0.8	2	40.0% achievement

SECTION 6: Improvement Roadmap

19. Priority Actions to Advance to Gold Level

To advance from Silver (62 pts) to Gold (≥ 70 pts), Manipal Group needs to gain approximately 8 additional points. The table below identifies the highest-impact actions with estimated point gains and implementation timelines.

Priority Action	Parameter	Est. Points Gain	Target FY	Lead Owner
Procure RECs / enter RE PPA for $\geq 20\%$ grid replacement	Renewable Energy	+3.0 pts	FY 2026	Facilities Director
Commission LCA for hospital consumables lifecycle	Product Stewardship	+2.5 pts	FY 2026	Sustainability Manager
Formalise Net Zero / SBTi commitment	GHG Reduction	+2.0 pts	FY 2026	CFO / Board
Implement ZLD at MAHE Manipal campus	Water Conservation	+1.5 pts	FY 2027	Facilities Director
Launch ZWTL programme — 80% diversion target	Waste Management	+2.0 pts	FY 2027	EHS Manager
Achieve ISO 50001 certification at major sites	Energy Efficiency	+1.0 pts	FY 2026	Energy Manager
Prepare Biodiversity Action Plan	Green Infrastructure	+0.5 pts	FY 2026	Campus Admin

20. Target Scorecard for Gold Level

Parameter	Current Score	Target Score	Gap	Key Action Required
1. Energy Efficiency	15.7 / 20	17.0 / 20	+1.3	ISO 50001 certification
2. Renewable Energy	7.0 / 15	11.0 / 15	+4.0	RE PPA / RECs procurement
3. Water Conservation	9.0 / 15	10.5 / 15	+1.5	ZLD pilot at TAPMI
4. GHG Reduction	9.1 / 15	11.1 / 15	+2.0	Net Zero / SBTi commitment
5. Waste Management	5.4 / 10	7.4 / 10	+2.0	ZWTL programme launch
6. Material Conservation	3.8 / 10	5.3 / 10	+1.5	Recycled content data + reporting
7. Green Supply Chain	3.1 / 5	4.0 / 5	+0.9	Expand supplier assessment to 70%
8. Product Stewardship	0.0 / 5	2.5 / 5	+2.5	Commission at least one LCA
9. Innovation	1.0 / 3	1.5 / 3	+0.5	CII Green Innovation Registry entry
10. Green Infrastructure	0.8 / 2	1.3 / 2	+0.5	Biodiversity Action Plan
TOTAL	62 / 100	71.6 / 100	+9.6	GOLD LEVEL TARGET

SECTION 7: Appendices

Appendix A: GreenCo Scorecard — Complete Indicator Listing

The complete GreenCo scorecard lists all sub-indicators under each of the 10 parameters, with scores assigned based on the CII GreenCo Assessment rubric. Data sources and scoring rationale are provided for each scored indicator.

Parameter	Sub-Indicator	Score	Max	Data Source
Energy (1)	Specific energy consumption (GJ/FTE)	3.2	4	Energy bills + HRMS
Energy (1)	Intensity reduction vs. baseline	3.0	4	TerraCAP calculation
Energy (1)	Energy management system	2.0	3	BEE certificate
Energy (1)	Audit frequency & coverage	2.4	3	BEE audit report
Energy (1)	Conservation projects count	2.5	3	Project register
Energy (1)	Savings achieved (GJ)	2.6	3	M&V; reports
Renewables (2)	RE share of total consumption (%)	3.8	6	Solar generation meters
Renewables (2)	On-site solar capacity (kWp)	3.2	5	EPC commissioning records
Renewables (2)	Off-site RE / RECs	0.0	4	None — pending
Water (3)	Specific water consumption (kL/FTE)	2.8	4	Water board bills
Water (3)	Intensity reduction vs. baseline	1.8	3	TerraCAP calculation
Water (3)	Rainwater harvesting (kL)	2.4	3	RWH pit records
Water (3)	Wastewater recycled (%)	2.0	3	STP output logs
Water (3)	ZLD status	0.0	2	Not implemented
GHG (4)	Scope 1 (tCO ₂ e)	2.4	3	Fuel purchase records
GHG (4)	Scope 2 location-based (tCO ₂ e)	2.5	3	DISCOM bills + CEA factor
GHG (4)	GHG intensity (tCO ₂ e/FTE)	2.0	3	TerraCAP auto-calc
GHG (4)	Intensity reduction (%)	2.2	3	TerraCAP calculation
GHG (4)	Net Zero / SBTi commitment	0.0	3	Not yet formalised

Appendix B: Calculation Methodologies & Emission Factors

GHG Emissions: GHG Protocol Corporate Accounting and Reporting Standard. Grid electricity emission factor: 0.82 kgCO₂e/kWh (KPTCL/MSEDCL weighted average, CEA 2023). Diesel: 2.683 kgCO₂e/litre (IPCC 2006). LPG: 2.983 kgCO₂e/kg. Refrigerant leakage: GWP100 per IPCC AR6. Energy conversions: 1 MWh = 3.6 GJ | 1 litre diesel = 0.0386 GJ | 1 kg LPG = 0.0461 GJ.

Appendix C: Site-wise Environmental Performance Data

Site	Energy (GJ)	Water (kL)	Waste (MT)	Solar (kWp)	Scope 1+2 (tCO2e)
MAHE Manipal Campus	[INSERT]	[INSERT]	[INSERT]	1,200	[INSERT]
MIT Campus	[INSERT]	[INSERT]	[INSERT]	850	[INSERT]
KMC Mangaluru	[INSERT]	[INSERT]	[INSERT]	720	[INSERT]
TAPMI	[INSERT]	[INSERT]	[INSERT]	280	[INSERT]
TMA Pai Hospital – Udupi	[INSERT]	[INSERT]	[INSERT]	180	[INSERT]
TMA Pai Rotary – Karkala	[INSERT]	[INSERT]	[INSERT]	120	[INSERT]
Lady Hill Hospital	[INSERT]	[INSERT]	[INSERT]	100	[INSERT]
Attavar Campus	[INSERT]	[INSERT]	[INSERT]	0	[INSERT]
Bejai Campus	[INSERT]	[INSERT]	[INSERT]	0	[INSERT]
TOTAL	167,081	628,000	1,437	3,450	17,010

Appendix D: Data Sources & Assurance Statement

Energy Data	<i>Electricity bills (KPTCL/MSEDCL), diesel purchase records, solar generation meters, BMS exports</i>
GHG Calculations	<i>GHG Protocol Corporate Standard; CEA 2023 grid factor; IPCC AR6 GWP100</i>
Water Data	<i>Water board invoices, bore well flow meter readings, STP/ETP output logs</i>
Waste Data	<i>Waste manifest records, CBWTF receipts, recycler certificates (Form-6 records)</i>
Employment Data	<i>HRMS system extract as of March 31, 2025</i>
Assessment Platform	<i>HWCAP – Hertzwave Carbon Accounting Platform (TerraCAP v2.0)</i>
Assurance Status	<i>Self-assessment prepared for CII GreenCo submission. Third-party verification by CII-authorized assessors to be conducted as part of the formal GreenCo rating process.</i>

END OF REPORT

This GreenCo Assessment Report template demonstrates HWCAP's capability to structure, populate, and present environmental performance data in compliance with the CII GreenCo Rating System v4. Yellow-highlighted sections contain AI-generated/platform data. Grey-highlighted sections require additional operational data from Manipal Group.

Generated by HWCAP – Hertzwave Carbon Accounting Platform Aspiring to be the Tally of ESG Space in India

For Demo Purposes – April 2025
